

(c) The beet sugar allotment, cane sugar allotment, State cane sugar allotments, proportionate shares, and allocations to each sugar beet processor and sugarcane processor will be increased or decreased, as appropriate, to reflect an overall allotment quantity adjustment.

(d) If the overall allotment quantity is reduced under paragraph (a) of this section and the quantity of sugar and sugar products any individual processor marketed by the time of the reduction exceeds the processor's reduced allocation, the quantity of excess sugar or sugar products marketed will be deducted from the processor's allocation under an allotment next established.

§ 1435.305 Beet and cane sugar allotments.

(a) The allotment for beet sugar will be 54.35 percent of the overall allotment quantity.

(b) The allotment for cane sugar will be 45.65 percent of the overall allotment quantity.

(c) A sugar beet processor allocated a share of the beet sugar allotment may use only beet sugar to fill such allocation. A sugarcane processor allocated a share of the cane sugar allotment may use only cane sugar to fill such allocation.

§ 1435.306 State cane sugar allotments.

(a) Hawaii and Puerto Rico will be allotted a total of 325,000 short tons, raw value, of the cane sugar allotment.

(b) A new entrant cane State will receive an allotment to accommodate a new processor's allocation under 1435.308(f).

(c) Subject to paragraphs (a) and (b) of this section, the remaining cane States will be allotted, in aggregate, the remaining cane sugar allotment.

(d) The individual cane State allotments, other than a new entrant cane State, will be based on:

- (1) Past marketings of cane sugar,
- (2) Past processing of cane sugar, and
- (3) The ability to market the sugar covered under the allotment assigned to the State.

(e) Past marketings and past processings will each be weighted by 0.25 and the ability to market will be weighted by 0.50 in determining the

States' respective cane sugar allotments. The weights may be adjusted, as CCC deems appropriate, for the crop year.

(f) Except when deficits are reassigned as provided in § 1435.309, a processor may fill an allocation of a cane sugar allotment only with sugar processed from sugarcane grown in the State for which the allotment was established.

§ 1435.307 Allocation of marketing allotments to processors.

(a) Each sugar beet processor's allocation of the beet allotment will be calculated as the beet processor's share times the beet sector allotment:

(1) A beet processor's share is calculated as the beet processor's adjusted weighted average sugar production divided by the sum of all beet processors' adjusted weighted average sugar production.

(2) A beet processor's weighted average sugar production equals 0.25 times its 1998-crop sugar production plus 0.35 times its 1999-crop sugar production plus 0.40 times its 2000-crop sugar production, with the 2000 sugar PIK payments added to its 2000-crop sugar production.

(3) A beet processor's weighted average sugar production shall be adjusted by the following, as CCC determines:

(i) Increased 1.25 percent of the sum of all beet processors' weighted average sugar production for opening a sugar factory during the 1996 through 2000 crop years;

(ii) Decreased 1.25 percent of the sum of all beet processors' weighted average sugar production for closing a sugar factory during the 1998 through 2000 crops years;

(iii) Increased 0.25 percent of the sum of all beet processors' weighted average sugar production for opening a molasses desugarization facility during the 1998 through 2000 crop years; and

(iv) Increased 1.25 percent of the sum of all beet processors' weighted average sugar production for suffering a substantial quality loss on stored beets, as CCC determines, during the 1998 through 2000 crop years.

(b) Each sugarcane processors' allocation from a State cane sugar allotment will be calculated as the cane

§ 1435.308

processor's share times the State cane sector allotment.

(1) Each cane processor's share, other than a new entrant, will be calculated as the processor's production base divided by the sum of the State's processor production bases.

(2) A processor's production base, other than a new entrant, is the sum of 0.50 times its ability to market plus 0.25 times its past processings plus 0.25 times its past marketings. These weights may be adjusted as CCC deems appropriate for the crop year.

(3) CCC will calculate an allocation for the Talisman processing facility, based on paragraph (b)(2) of this section and distribute the allocation among Florida processors according to the agreements between cane processors and the Secretary of the Interior dated March 25, and March 26, 1999.

(c) An informal hearing will be held in August of each year, if requested by affected sugarcane processors and growers by July 15th, to afford all interested persons the opportunity to comment on the next crop year's marketing allotments and allocations. After consideration of comments obtained at the hearing, a final determination on cane State allotments and processor allocations will be announced.

(d) During any crop year in which marketing allotments are in effect and allocated to processors, the quantity of sugar and sugar products that a processor markets shall not exceed the quantity of the processor's allocation.

(e) Paragraph (d) of this section shall not apply to:

(1) Any sugar marketings to facilitate the export of sugar or sugar-containing products,

(2) Any sugar marketings for nonhuman consumption, and

(3) Any processor marketings of sugar to another processor made to enable the purchasing processor to fulfill its allocation if such sales:

(i) Are made before May 1, and

(ii) Reported to CCC within 5 days of the date of sale.

(f) CCC may charge liquidated damages as specified in a surplus allocation survey and agreement on such sales made after May 1 if the purchasing processor had surplus allocation after

7 CFR Ch. XIV (1-1-04 Edition)

May 1 because the purchasing processor provided incomplete or erroneous information to CCC.

§ 1435.308 Transfer of allocation, new entrants

(a) If a sugar beet or sugarcane processing facility is closed and the growers that delivered their crops to the closed facility elect to deliver their crops to another processor, the growers may petition the Executive Vice President, CCC, to transfer the share of allocation commensurate with the growers' production history from the processor that closed the facility to their new processor. CCC may grant the request to transfer the allocation upon:

(1) Written approval of the processing company that will accept the additional deliveries, and

(2) Evidence satisfactory to CCC that the new processor has the capacity to accommodate the production of petitioning growers.

(b) Subject to paragraph (a) of this section, CCC will eliminate the allocation of the processor who has been dissolved or liquidated in a bankruptcy proceeding and the allocation will be distributed to all other processors on a pro-rata basis.

(c) If the purchasing processor is not a new entrant, then the purchased plants must operate for the initial season and the following crop year for the purchasing processor to permanently obtain the allocation. CCC shall reassign the allocation on a pro rata basis if the purchased plants do not operate for the required 2 crop years.

(d) If the purchasing processor is a new entrant, then CCC shall immediately transfer allocation commensurate with the purchased factories' production history with no requirement on operating the facility for 2 crop years.

(e) Allocations, equal to the number of acres of proportionate shares being transferred times the State's per-acre yield goal, will be transferred between mills in proportionate share States, if the transfers are based on:

(1) Written consent of the crop-share owners, or their representative representatives,
